

Professional Development Opportunities for your staff!

What's on Offer?

The **Group Training Northern Territory (GTNT) Foundation** is offering places for NT secondary teachers to be involved in a Teacher Release Program.

Why should I support it?

As a result of this Program, participating teachers should:

- gain a greater understanding of the VET sector and the opportunities available for students
- develop stronger links between vocational education & training, your school and industry.

Vocational education and training delivery are an important part of the role of modern schools. Your school can only gain by having staff who have a thorough understand of this sector.

How does it work?

The successful applicants become part of the GTNT team for up to 10 working days, covering some or all of these key areas:

- apprenticeship recruitment and selection
- workplace visits with GTNT Field Officers
- training delivery to apprentices through the GTNT Training Centre.

The GTNT Foundation will fund a relief teacher for the period of the placement.

Who is eligible?

The professional development opportunities are open to qualified graduate teachers with current full-time approval to teach in NT Secondary Schools, involved in one or more of the following:

- vocational education and training delivery or coordination in schools
- careers education delivery or coordination
- year 11 or 12 student coordination.

If you meet these criteria then we encourage you to apply for this opportunity to improve your knowledge of VET to support your students.

What do you want me to do?

We ask that you promote this initiative to your staff and support their applications. We have enclosed a poster for the staff notice board and an application guide for your information.

For more information & application guides:
